

# Welcome to our shop!

A key part of STF's sustainability pledge is working sustainably with our cabin shops. We do this above all by carefully considering the following:

## Shop location and product range

**Strategically placed shops** – so you can plan your purchases and don't need to pack too heavily.  
**Two ranges** – you'll find the essentials in every shop, with an extended range at selected cabins.

## Our choice of products

**Long shelf life** – far-off expiry dates to withstand longer storage at the mountain cabin.

**Packaging** – packaging must be possible to handle properly in the mountains.

**Not bulky** – transport-efficient and storage-friendly.

**Demand in the mountains** – we want to offer what our guests are looking for in the mountains.

## Information for you as a shopper

**Waste management** – you handle your own waste and can leave your sorted waste for onward transport from the mountains.

**Your part** – clean and compress. Please carry hard-to-handle waste out with you.

**Buy what you eat** – plan and shop to avoid food waste, which is hard to handle in the mountains.

# Shopping in roadless country

Here we show how we work and think about sustainability at every stage involved.
